DID YOU KNOW?

...the motto of the Credit Unions is "People Helping People"?

The first Credit Union began in Germany in the

mid-1800s. A group of farmers pooled their money together during a horrible depression to escape the local moneylenders. It allowed the farmers to borrow money from one another at lower rates. The idea was successful and spread from there, thus creating a true philosophy of "People Helping People" SO, when members fully participate in the Credit Union and bring all their banking needs, we can help more people with our services.
